# Customer Testimonials

---

“

We have specific needs for what language we use and certain things, and Performance Health Partners helped us build the Safety, Risk, and Compliance Solutions tool to reflect our hospital's needs. And when certain things didn't work, they fixed them immediately. I have never dealt with a company like this. They are so responsive, are so kind. They send us handwritten thank-you notes. They are just a different kind of company, the kind that I would like to see more of.

—Analyst/Coordinator, June 2024”

“

PHP is continually providing webinar training for their clients, and they listen to our recommendations for improvement. They are a phone call or email away, and they respond very quickly. There is no additional cost for their support, yet they are eager to help in any way possible. What is most impressive is they provide person-to-person support. I never have to speak to a bot or listen to a recording to get to a live person. Overall, I would highly recommend this company to any business seeking compliance- and risk-related services.

“

I can't say anything negative about Performance Health Partners. I have been in this industry a long time, and I have evaluated a lot of systems. The people are fantastic. They are true to their word, and they are knowledgeable. We were able to negotiate the price, and because we are a small facility, they were very receptive to this. I have never had that experience with any software program or medical record system vendor that I have used in the past. Performance Health Partners has a good product, and they have a tremendous future in the industry if they keep this up.
